

## ADVANTAGES

- Incinerable bags
- High dust holding capacity = long life
- Recommended choice for gas turbine pre-filtration
- Hybrid Technology media
- Maximum surface use
- High mechanical strength

<b>Application</b>	Installations exposed to turbulence and harsh environments
<b>Frame</b>	Galvanised steel
<b>Gasket</b>	Flat gasket
<b>Media</b>	Hybrid Synthetic and Glass Technology
<b>Rec. final pressure drop</b>	450 Pa
<b>Max airflow</b>	1,1 x nominal flow
<b>Max Temperature (°C)</b>	70°C
<b>Relative Humidity max</b>	100%
<b>Comment</b>	Additional information: Available in half - and special size filters on request

The Cam-Flo Hybrid is a new generation of premium bag filters for gas turbines that utilize the breakthrough Hybrid media technology to combine glass fiber and synthetic fibers. The results is a smart solution for an extended filter life, a stable and predictable performance, and most of all, carefree operations. Self-supporting bags and a unique design make this filter an excellent pre-filter and coalescer choice for turbomachinery applications.

Art. No.	Type	ISO 29461	EN779	ASHRAE 52.2-2017	Dimensions WxHxD (mm)	Airflow/pressure drop (m³/h/Pa)	Bags
